

SENIOR DESIGNER

InVue is seeking an energetic individual who can impress and inspire the company president and marketing directors, in partnership with design management and leadership. The Industrial Designer will also work closely with product design engineers through product design execution to maintain design intent.

RESPONSIBILITIES:

- Carry out new product development in adherence to InVue's established visual brand language
- Interpret the established InVue visual brand language into the maximum number of clever concepts.
- Design solutions should express both aesthetic and functional/mechanical elegance.

EDUCATION AND EXPERIENCE:

- 1-5 years of experience and a BS/BA degree in Industrial Design from an accredited school.
- Inspiring 2D skills including rapid ideation, outstanding sketching, Illustrator, Photoshop, SketchBook Pro, etc...
- Advanced 3D visualization using Alias, and/or SolidWorks.
- Ability to support design manager thru all phases of product development.
- Must have the ability to work collaboratively and build on the ideas of others, on multiple programs simultaneously.
- Should possess a strong mechanical design aptitude, blended with an excellent aesthetic sense and critical design thinking skills.
- Successful applicants will passionately pursue prototyping as a means to arrive at ideas of exceptional utility.
- Should be organized, self-managing, motivated, highly creative and entrepreneurial.
- Experience working in a variety of categories and materials, and have a working knowledge of various manufacturing processes.
